

# Fertilizer does not belong in our waterways!

<https://www.facebook.com/photo/?fbid=834343455400970&set=a.324498099718844>

You can have a great lawn, save money, and protect local waterways!

Runoff from rain and irrigation carries fertilizer into water bodies, harming fish and wildlife, causing algae blooms, and contaminating drinking water sources, posing environmental risks.

Find out more about fertilizer alternatives and best application practices here: <https://yourcleanwater.org/lawn/>
